INTRODUCTION

The Galaxy 3 Series alarm system is a microprocessor and 32 keypads to the Galaxy 3-520 control panel. To access the menu, enter a valid code and press the enter key. An access control system can be used for virtually any door where you want to regulate and monitor access. Interior or exterior doors can easily be supervised. This manual and the Solaris X Window System Reference Manual cover all man pages. To access these man pages, add /usr/openwin/man to the $MANPATH.

Audio Control is an OpenWindows DeskSet application that controls and configures the lator button. A lator button can have either a 2D or a 3D look, and the keys can be in either.
